

# Prism for A Hologram Video

From the Mister Chuck Channel: <https://youtu.be/hYxTbummBtg>

You Will Need...

Ruler

Scissors

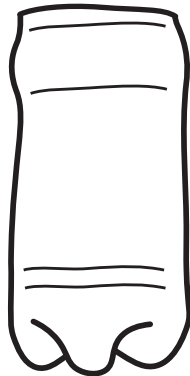

Empty water bottle

1.

Cut the upper top of the bottle away from the bottom. You will only need the top part. Recycle the bottom part of the bottle.

**REMEMBER!** *Any time a child uses scissors, there must be an adult present.*

2.

Then cut the very top of the bottle away (the part you drink from). You will only need the part without the drinking spout and recycle the drinking spout part.

3.

Next, take a ruler and make four crises in the water bottle. Shape the round top into a rectangle using the ruler to straighten the edges.
